

CAP.CO

ELECTRONICS LTD

SPC-300 'D' and SPC 3000 'D'

Stay Tuned Forever with a CAP. CO A.T.U. – Once Bought, Never Replaced

SPECIAL FEATURE

Our unique modular design incorporates all the main components in just one block which eliminates stray inductance and capacitance effecting a much higher 'Q'. This feature is not found on any other Antenna Tuning Unit

SPC-300 'D' and SPC 3000 'D'

FEATURES

- Three switched aerial positions
- Direct and through switch for bypassing A.T.U.
- Built in 4 to 1 balun for balanced to unbalanced
- Renowned SPC super transmatch proven circuitry
- Infinitely variable roller coaster with very accurate mechanical display for easy reset, also includes counter lock mechanism
- Uses relay switching instead of the normal lossy mechanical switching
- 6 to 1 reduction drives on capacitors for ease of tuning with large sure grip control knobs
- Very large spaced capacitors allowing much higher impedances to be encountered
- Really solid British engineering at its very best
- Will tune virtually any aerial/transmitter combination to optimum
- Superlative finish, looks compatible with most radio transceiver equipment

TECHNICAL SPECIFICATION

- Input impedance – 50 to 75 ohm from transceiver
- Output impedance – $\frac{1}{4}$ ohm to several thousand ohms
- Tuning range – 1 mhz to 29.985 mhz continuous – no gaps
- Power rating – SPC-300 'D' – 1kw pep, 300 watts continuous
SPC-3000 'D' – 3kw pep, 1,500 watts continuous

Look out for NEW PRODUCTS in the CAP. CO range of antenna tuning units, including 2 and 6 metre versions.
