SILVER

SPELLS TOP VALUE AT LOWEST COST

Exactly as SILVER is known the world over for producing Laboratory Caliber Electronic Test Instruments — LCETI — for critical users at unbelievably low prices, so you'll find that your dollars will buy you the most in amateur equipment when you select SILVER. Examine the instruments here illustrated and highlighted. Compare — and you'll see why more and more amateurs turn to SILVER.

908

MODEL 908 MICROMATCH standing wave ratio and r.f. wattmeter will let you put more power into your antenna — from your present transmitter — for only **\$29.90**.

MODEL 800 U.H.F. RECEIVER is E. P. Tilton's A.R.R.L. HANDBOOK, "T.R.F. Superregenerative Receiver" — the sweetest performing 2½ and 1¼ meter, non-radiating receiver we've seen — in finished commercial form for only **\$39.75** less tubes and power supply.

MODEL 700 U.H.F. TRANSMITTER is xtal controlled for maximum signaling effectiveness in 2½ and 1¼ meter bands, yet costs you only **\$36.95** less tubes and power supply.

MODEL 701 TRANSMITTER goes into more amateur stations to produce more CW and phone DX than anything else, it seems. A 6AQ5 Tritet drives an 807 to 75 watts CW, 30 watts phone, input, 80 through 6 meters. Modulator is built-in. Less coils (3 per band at \$.50 ea.), power supply, 4 tubes and crystal, it's the outstanding transmitter "buy" at **\$36.95**.

MODEL 801 RECEIVER covers 450 kc. through 60 mc., consisting of r.f. stage, regenerative detector, two a.f. stages and built-in speaker. It's the old reliable standby — just the thing for portable, emergency, test — and serious ham reception. **\$29.95** for 6.3 volt operation; **\$28.95** for 1.5 volt dry battery tubes; coils, **\$1.00** per pair.

MODEL 703 is new — a pre-tuned bandpass freq. multiplier. Driven by any VFO or xtal, it puts you in any band 80 through 6 meters, on selected freq. as fast as you can turn two knobs. Its 807 gives 40 watts max. output and instant control of every band. Price **\$49.90**.

MODEL 802 SUPER-HETERODYNE RECEIVER is an amateur-band-only receiver using i.f. regeneration to give variable phone up to single-signal CW selectivity. Following A.R.R.L. HANDBOOK teachings, it provides more than usual 8-tube results, over 7 feet of band spread on 80, 40, 20, 16, 11, 10 and 6 meter bands, all for only **\$38.95** less tubes, power supply and coils at **\$1.00** per pair.

MODEL 903 ABSORPTION WAVEMETER is close to the most useful instrument in any shack. Thousands in use attest its prime necessity. Price is but **\$3.30** net, plus **\$.65** ea. for plug-in coils covering 1600 kc. up to 500 mc.

MODEL 702 VFO includes NFM. Covering 3,000 through 4,000 kc., its 3-watt output may be multiplied 80 through 2½ meters. It's something brand new — a crystal controlled VFO including and using a 5 mc. xtal frequency standard to give complete break-in operation, superbly clean keying — the VFO you've dreamed would come. Only **\$49.90** less tubes, including power supply.

TYPE 619 AIR TRIMMER CAPACITORS are high Q, low-loss, good up beyond 500 mc. for tuning, trimming, coupling, etc. 3 mmfd. to 30 mmfd. spread out over 3 complete revolutions for easy adjustment. Like all SILVER instruments, price is more than right—only **\$1.30** ea., net.
