Pierson KE-93

Graphically contrasted above is a decade of amazing electronic development! Packed into one-eighth the size and weight of former models, this new KE-93 receiver is many times superior, not only to its predecessor, but to any comparable receiver on the market today. The AC pack, containing speaker and S meter, is shown with the receiver.

The KE-93 12-tube, all band receiver far surpasses all rigid requirements for mobile receivers: high resistance to shock, vibration, temperature, humidity, and noise. Beats most high-priced table-top receivers!

NEW! A 2 and 6 meter crystal controlled converter. Order yours now!

- Dual conversion, crystal second mixer
- Shows only band in use
- Extreme selectivity and sensitivity
- Receiver size: 6" x 5" x 9"
- Newly designed circuits and silencer
- A.M., C.W., and S.S.B. switch
- Simple 7-band turret switching
- 6 or 12 V.D.C. or 110 V.A.C. power packs
