

FT-450 Dial Kit

The FT-450 Dial kit will provide a great new tuning feel.

SUPPLIED ITEMS

You Should find the following items are shipped with this kit:

- Tuning Knob (RA082910C) 1 pc
- Rubber Ring (RA0829300) 1 pc

IMPORTANT NOTE

A 2-mm (5/64") Allen Wrench is needed for this modification.

INSTALLATION

- Gently remove the original Rubber Ring from the Tuning Knob of the transceiver.
- Access the Setscrew through the hole in the edge of the Tuning Knob. Use the Allen Wrench to loosen the Setscrew just enough to allow the Tuning Knob to be pulled off the shaft.
- Remove and discard the Tension Spring and Plastic Washer from the shaft.
- Install the New Tuning Knob, and tighten the Setscrew.
- Confirm that the Tuning Knob turns smoothly.
- Place the New Rubber Ring on the Tuning Knob.
- The installation is now complete.
